## Note 1 ▼ Accounting principles and methods of evaluation

### 1.1. Statement of compliance

In compliance with European Regulation (EC) 1606 / 2002 issued by the European Parliament on July 19, 2002 on the enforcement of International Accounting Standards, Vicat's consolidated financial statements have been prepared, since January 1, 2005 - in accordance with International Financial Reporting Standards (IFRS) - as adopted by the European Union. Vicat has adopted those standards that are in force on June 30, 2012 for its benchmark accounting principles.

The standards, interpretations and amendments published by the IASB but not yet in effect as of June 30, 2012 were not applied ahead of schedule in the Group's consolidated financial statements at the closing date. This relates to IAS 1 amendment concerning the display form of the other comprehensive incomes and IAS 19 amendments concerning post employment benefits.

The financial statements at June 30, 2012 were prepared in accordance with IAS 34 "Interim Financial Reporting". As condensed financial statements, they have to be read in relation with those prepared for the annual year ended December 31, 2011 in accordance with International Financial Reporting Standards (IFRS). Moreover, they present comparative data for the previous year prepared under these same International Financial Reporting Standards. The accounting policies applied for the financial statements at June 30, 2012 are consistent with the ones applied by the Group at December 31st, 2011, except for the standards which are effective for the period beginning on or after January 1st, 2012.

These new standards, which prospective application, have no impact on the interim consolidated financial statements.

These financial statements have been definitively prepared and approved by the Board of directors on August 2nd, 2012.

### 1.2. Basis of preparation of financial statements

The financial statements are presented in thousands of euros.

The statement of comprehensive income is presented by type in two statements: the consolidated income statement and the consolidated statement of other comprehensive income.

The consolidated statement of financial position segregates current and non-current asset and liability accounts and splits them according to their maturity (divided, generally speaking, into maturities of less than and more than one year).

The statement of cash flows is presented according to the indirect method.

The financial statements were prepared using the historical cost method, except for the following assets and liabilities, which are recognized at fair value: derivatives, assets held

for trading, assets available for sale, and the portion of assets and liabilities covered by an hedging transaction.

The accounting principles and valuation methods described hereinafter have been applied on a permanent basis to all of the financial years presented in the consolidated financial statements.

The establishment of consolidated financial statements under IFRS requires the Group's management to make a number of estimates and assumptions, which have a direct impact on the financial statements. These estimates are based on the going concern principle and are established on the basis of the information available at the date they are carried out. They concern mainly the assumptions used to:

- value the provisions (notes 1.17. and 8), in particular those for pensions and other post-employment benefits (notes 1.15. and 8);
- value the put options granted to third parties on shares in consolidated subsidiaries (notes 1.16 and 9.2);
- value financial instruments at their fair value (notes 1.14. and 10);
- perform the valuations adopted for impairment tests (notes 1.4., 1.11. and 3);
- define the accounting principle to be applied in the absence of a definitive standard (notes 1.7. and 4 concerning emission quotas).

The estimates and assumptions are reviewed regularly, whenever justified by the circumstances, at least at the end of each year, and the pertinent items in the financial statements are updated accordingly.

### 1.3. Consolidation principles

When a company is acquired, the fair value of its assets and liabilities is evaluated at the acquisition date.

The earnings of the companies acquired or disposed of during the year are recorded in the consolidated income statement for the period subsequent or previous to, depending on the case, the date of the acquisition or disposal.

The group financial statements at June 30, 2012 are consolidated, and any necessary adjusting entries are made to restate them in accordance with the Group accounting principles. All material intercompany balances and transactions are eliminated during the preparation of the consolidated financial statements.

#### Subsidiaries:

Companies that are controlled exclusively by Vicat, directly or indirectly, are fully consolidated.

#### Joint ventures:

Joint ventures, which are jointly controlled and operated by a limited number of shareholders, are proportionally consolidated.

#### Associated companies:

Investments in associated companies over which Vicat

exercises notable control are reported using the equity method. Any goodwill generated on the acquisition of these investments is presented on the line "Investments in associated companies (equity method)."

The list of the principal companies included in the consolidation scope at June 30, 2012 is provided in Note 23.

#### 1.4. Business combinations – goodwill

With effect from January 1, 2010, business combinations are reported in accordance with IFRS 3 "Business Combinations" (Revised) and IAS 27 "Consolidated and Separate Financial Statements" (Revised). As these revised standards apply prospectively, they do not affect business combinations carried out before January 1, 2010.

##### Business combinations carried out before January 1, 2010:

These are reported using the acquisition method. Goodwill corresponds to the difference between the acquisition cost of the shares in the acquired company and purchaser's pro-rata share in the fair value of all identified assets, liabilities and contingent liabilities at the acquisition date. Goodwill on business combinations carried out after January 1, 2004 is reported in the currency of the company acquired. Applying the option offered by IFRS 1, business combinations completed before the transition date of January 1, 2004 have not been restated, and the goodwill arising from them has been maintained at its net value in the balance sheet prepared according to French GAAP as at December 31, 2003.

In the event that the pro-rata share of interests in the fair value of net assets, liabilities and contingent liabilities acquired exceeds their cost ("negative goodwill"), the full amount of this negative goodwill is recognized in the income statement of the reporting period in which the acquisition was made, except for acquisitions of minority interests in a company already fully consolidated, in which case this amount is recognized in the consolidated shareholders' equity.

The values of assets and liabilities acquired through a business combination must be definitively determined within 12 months of the acquisition date. These values may thus be adjusted at any closing date within that time frame.

Minority interests are valued on the basis of their pro-rata share in the fair value of the net assets acquired.

If the business combination takes place through successive purchases, each material transaction is treated separately, and the assets and liabilities acquired are so valued and goodwill thus determined.

##### Business combinations carried out on or after January 1, 2010:

IFRS 3 "Business Combination" (Revised), which is mandatory for business combinations carried out on or after January 1, 2010, introduces the following main changes compared with the previous IFRS 3 (before revision):

- goodwill is determined once, on takeover of control.

The Group then has the option, in the case of each business combination, on takeover of control, to value the minority interests:

- either at their pro-rata share in the identifiable net assets of the company acquired (partial-goodwill option);
- or at their fair value (full-goodwill option).

Valuation of the minority interests at fair value has the effect of increasing the goodwill by the amount attributable to such minority interests, translated by the recognition of goodwill as "full".

- any adjustment in the acquisition price at fair value from the date of acquisition is to be reported, with any subsequent adjustment occurring after the 12-month appropriation period from the date of acquisition to be recorded in the income statement.

- the costs associated with the business combination to be recognized in the expenses for the period in which they were incurred.

- in the case of combinations carried out in stages, on takeover of control, the previous holding in the company acquired is to be revalued at fair value on the date of acquisition and any gain or loss which results is to be recorded in the income statement.

In compliance with IAS 36 (see note 1.11), at the end of each year, and in the event of any evidence of impairment, goodwill is subjected to an impairment test, consisting of a comparison of its net carrying cost with its value in use as calculated on a discounted projected cash flow basis. When the latter is below carrying cost, an impairment loss is recognized for the corresponding loss of value.

#### 1.5. Foreign currencies

##### Transactions in foreign currencies:

Transactions in foreign currencies are translated into the operating currency at the exchange rates in effect on the transaction dates. At the end of the year, all monetary assets and liabilities denominated in foreign currencies are translated into the operating currency at the year-end exchange rates, and the resulting exchange rate differences are recorded in the income statement.

##### Translation of financial statements of foreign companies:

All assets and liabilities of Group companies denominated in foreign currencies that are not hedged are translated into euros at the year-end exchange rates, while income and expense and cash flow statement items are translated at average exchange rates for the year. The ensuing translation differences are recorded directly in shareholders' equity.

In the event of a later sale, the cumulative amount of translation differences relating to the net investment sold and denominated in foreign currency is recorded in the income statement. Applying the option offered by IFRS 1, translation

differences accumulated before the transition date were zeroed out by allocating them to consolidated reserves at that date. They will not be recorded in the income statement in the event of a later sale of these investments denominated in foreign currency.

The following foreign exchange rates were used:

	Closing rate		Average rate	
	June 30, 2012	Dec. 31, 2011	June 30, 2012	June 30, 2011
USD	1.259	1.2939	1.2968	1.4031
CHF	1.203	1.2156	1.2048	1.2704
EGP	7.67	7.819	7.8527	8.2467
TRL	2.2834	2.4432	2.336	2.2064
KZT	189.32	192.490	192.387	204.962
MRO	372.223	374.644	384.328	395.292
INR	70.12	68.713	67.6102	63.1315

### 1.6. Other intangible assets

Intangible assets (mainly patents, rights and software) are recorded in the consolidated statement of financial position at historical cost less accumulated amortization and any impairment losses. This cost includes acquisition or production costs and all other directly attributable costs incurred for the acquisition or production of the asset and for its commissioning.

Assets with finite lives are amortized on a straight-line basis over their useful life (generally not exceeding 15 years).

Research costs are recognized as expenses in the period in which they are incurred. Development costs meeting the criteria defined by IAS 38 are capitalized.

### 1.7. Emission quotas

In the absence of a definitive IASB standard concerning greenhouse gas emission quotas, the following accounting treatment has been applied:

- the quotas allocated by the French government in the framework of the National Plan for the Allocation of Quotas (PNAQ II) are not recorded, either as assets or liabilities. (14,011 thousand tonnes for the period 2008-2012);
- only the quotas held in excess of the cumulative actual emissions are recorded in the intangible assets at year end;
- recording of surpluses, quota sales and quota swaps (EUA) against Emission Reduction Certificates (ERCs) are recognized in the income statement for the period.

### 1.8. Property, plant and equipment

Property, plant and equipment are reported in the consolidated statement of financial position at historical cost less accumulated depreciation and any impairment losses, using the component approach provided for in IAS 16. When an article of property, plant and equipment comprises several significant components with different useful lives, each component is amortized on a straight-line basis over its respective useful life, starting at commissioning.

Main amortization durations are presented below depending on the assets category:

	Cement assets	Concrete & aggregates assets
Civil engineering	15 to 30 years	15 years
Major installations	15 to 30 years	10 to 15 years
Other industrial equipment	8 years	5 to 10 years
Electricity	15 years	5 to 10 years
Controls and instruments	5 years	5 years

Quarries are amortized on the basis of tonnage extracted during the year in comparison with total estimated reserves.

Certain parcels of land owned by French companies acquired prior to December 31, 1976 were revalued, and the adjusted value was recognized in the financial statements, but without a significant impact on the lines concerned.

Interest expenses on borrowings incurred to finance the construction of facilities during the period prior to their commissioning are capitalized. Exchange differences arising from foreign currency borrowings are also capitalized inasmuch as they are treated as an adjustment to interest costs and within the limit of the interest charge which would have been paid on borrowings in local currency.

### 1.9. Leases

In compliance with IAS 17, leases on which nearly all of the risks and benefits inherent in ownership are transferred by the lessor to the lessee are classified as finance leases. All other contracts are classified as operating leases.

Assets held under finance leases are recorded in tangible assets at the lower of their fair value and the current value of the minimum rent payments at the starting date of the lease and amortized over the shortest duration of the lease and its useful life, with the corresponding debt recorded as a liability.

### 1.10. Investment properties

The Group recognizes its investment properties at historical cost less accumulated depreciation and any impairment losses. They are depreciated on a straight-line basis over their useful life (10 to 25 years). The fair value of its investment properties is calculated by the Group's qualified departments.

It is based primarily on valuations made by capitalizing rental income or taking into account market prices observed on transactions involving comparable properties, and is presented in the notes at each year-end.

### **1.11. Impairment**

In accordance with IAS 36, the book values of assets with indefinite lives are reviewed at each year-end, and during the year, whenever there is an indication that the asset may be impaired. Those with finite lives are only reviewed if impairment indicators show that a loss is likely.

An impairment loss has to be recorded as an expense on the income statement when the carrying cost of the asset is higher than its recoverable value. The latter is the higher of the fair value less the costs of sale and the value in use. The value in use is calculated primarily on a discounted projected cash flow basis over 10 years. This time period corresponds to the Group's capital-intensive nature and the longevity of its industrial plant.

The projected cash flows are calculated on the basis of the following components that have been inflated and then discounted:

- the Ebitda from the Long Term Plan over the first 5 years, then projected to year 10;
- the sustaining capital expenditure;
- and the change in working capital requirement.

Projected cash flows are discounted at the weighted average capital cost (WACC) before tax, in accordance with IAS 36 requirements. This calculation is made per country, taking into account the cost of risk-free long-term money, market risk weighted by a sector volatility factor, and a country premium reflecting the specific risks of the market in which the concerned cash generating unit operates.

If it is not possible to estimate the fair value of an isolated asset, it is assessed at the level of the cash generating unit that the asset is part of insofar as the industrial installations, products and markets form a coherent whole. The analysis was thus carried out for each geographical area/country/activity, and the cash generating units were determined depending on the existence or not of vertical integration between the Group's activities in the area concerned.

The value of the assets tested, at least annually using this method for each cash generating unit comprises the intangible and tangible non-current assets and the Working Capital Requirement.

These impairment tests are sensitive to the assumptions held for each cash generating unit, mainly in terms of:

- discount rate as previously defined;
- inflation rate, which must reflect sales prices and expected future costs.

Tests are conducted at each year-end on the sensitivity to an increase or decrease of one point in the discount rate applied,

in order to assess the effect on the value of goodwill and other intangible and tangible assets included in the Group's consolidated financial statements. Moreover, the discount rate includes a country risk premium and an industry sector risk premium reflecting the cyclical nature of certain factors inherent in the business sector, enabling an understanding of the volatility of certain elements of production costs, which are sensitive in particular to energy costs.

Recognized impairments can be reversed and are recovered in the event of a decrease, except for those corresponding to goodwill, which are definitive.

### **1.12. Inventories**

Inventories are valued using the weighted average unit cost method, at the lower of purchase price or production cost, and net market value (sales price less completion and sales costs).

The gross value of merchandise acquired for resale and of supplies includes both the purchase price and all related costs.

Manufactured goods are valued at production cost, including the cost of goods sold, direct and indirect production costs and the depreciation on all consolidated fixed assets used in the production process.

In the case of inventories of manufactured products and work in progress, the cost includes an appropriate share of fixed costs based on the standard conditions of use of the production plant.

Inventory depreciations are recorded when necessary to take into account any probable losses identified at year-end.

### **1.13. Cash and cash equivalents**

Cash and cash equivalents include both cash and short-term investments of less than 3 months that do not present any risk of a change in value. The latter are marked to market at the end of the period. Net cash, the change in which is presented in the statement of cash flows, consists of cash and cash equivalents less any bank overdrafts.

### **1.14. Financial instruments**

#### **Financial assets:**

The Group classifies its non-derivative financial assets, when they are first entered in the financial statements, in one of the following four categories of financial instruments in accordance with IAS 39, depending on the reasons for which they were originally acquired:

- long-term loans and receivables, financial assets not quoted on an active market, the payment of which is determined or can be determined; these are valued at their amortized cost;
- assets available for sale which include in particular, in accordance with the standard, investments in non-consolidated affiliates; these are valued at the lower of their

carrying value and their fair value less the cost of sale as at the end of the period;

- financial assets valued at their fair value by the income, since they are held for transaction purposes (acquired and held with a view to being resold in the short term);
- investments held to term, including securities quoted on an active market associated with defined payments at fixed dates; the Group does not own such assets at the year-end of the reporting periods in question.

All acquisitions and disposals of financial assets are reported at the transaction date. Financial assets are reviewed at the end of each year in order to identify any evidence of impairment.

**Financial liabilities:**

The Group classifies its non-derivative financial assets, when they are first entered in the financial statements, as financial liabilities valued at amortized cost. These comprise mainly borrowings, other financings, bank overdrafts, etc. The Group does not have financial liabilities at fair value through the income statement.

**Treasury shares:**

In compliance with IAS 32, Vicat's treasury shares are recognized net of shareholders' equity.

**Derivatives and hedging:**

The Group uses hedging instruments to reduce its exposure to changes in interest and foreign currency exchange rates resulting from its business, financing and investment operations. These hedging operations use financial derivatives. The Group uses interest rate swaps and caps to manage its exposure to interest rate risks. Forward FX contracts and currency swaps are used to hedge exchange rate risks.

The Group uses derivatives solely for financial hedging purposes and no instrument is held for speculative ends. Under IAS 39, however, certain derivatives used are not, not yet or no longer, eligible for hedge accounting at the closing date.

Financial derivatives are valued at their fair value in the balance sheet. Except for the cases detailed below, the change in fair value of derivatives is recorded as an offset in the income statement of the financial statement ("Change in fair value of financial assets and liabilities"). The fair values of derivatives are estimated by means of the following valuation models:

- the market value of interest rate swaps, exchange rate swaps and term purchase/sale transactions is calculated by discounting the future cash flows on the basis of the "zero coupon" interest rate curves applicable at the end of the preceding reporting periods, restated if applicable according to interest incurred and not yet payable;
- interest rate options are revalued on the basis of the Black and Scholes model incorporating the market parameters as at year end.

Derivative instruments may be designated as hedging instruments, depending on the type of hedging relationship:

- fair value hedging is hedging against exposure to changes in the fair value of a booked asset or liability, or of an identified part of that asset or liability, attributable to a particular risk, in particular interest and exchange rate risks, which would affect the net income presented;
- cash flow hedging is hedging against exposure to changes in cash flow attributable to a particular risk, associated with a booked asset or liability or with a planned transaction (e.g. expected sale or purchase or "highly probable" future operation), which would affect the net income presented.

Hedge accounting for an asset / liability / firm commitment or cash flow is applicable if:

- the hedging relationship is formally designated and documented at its date of inception;
- the effectiveness of the hedging relationship is demonstrated at the inception and then by the regular assessment and correlation between the changes in the market value of the hedging instrument and that of the hedged item. The ineffective portion of the hedging instrument shall be recognized in the income statement.

The application of hedge accounting results as follow:

- in the event of a documented fair value hedging relationship, the change in the fair value of the hedging derivative is recognized in the income statement as an offset to the change in the fair value of the underlying financial instrument hedged. Income is affected solely by the ineffective portion of the hedging instrument;
- in the event of a documented cash flow hedging relationship, the change in the fair value of the effective portion of the hedging derivative is recorded initially in shareholders' equity, and that of the ineffective portion is recognized directly in the income statement. The accumulated changes in the fair value of the hedging instrument previously recorded in shareholders' equity are transferred to the income statement at the same rate as hedged cash flows.

**1.15. Employee benefits**

The regulations, customs and contracts in force in the countries in which the consolidated Group companies are present provide for post-employment benefits, such as retirement indemnities, supplemental pension benefits, supplemental pensions for senior management, and other long-term post-employment benefits, such as medical cover, etc.

Defined contribution plan in which contributions are recognized as expenses when they are incurred, does not represent a future liability for the Group, these plans do not require any provisions to be set aside.

Defined benefit plans include all post-employment benefit programs, other than those under defined contribution plans, and represent a future liability for the Group. The

corresponding liabilities are calculated on an actuarial basis (wage inflation, mortality, employee turnover, etc.) using the projected unit credit method, in accordance with the clauses provided for in the collective bargaining agreements and with custom and practice.

Dedicated financial assets, which are mainly equities and bonds, are used to cover all or a part of these liabilities, principally in the United-States and Switzerland. These liabilities are thus recognized in the statement of financial position net of the fair value of such invested assets, if applicable. Any surplus of asset is only capitalized in the statement of financial position to the extent that it represents a future economic benefit that will be effectively available to the Group, within the limit of the IAS 19 cap.

Actuarial variances arise due to changes in actuarial assumptions and/or variances observed between these assumptions and the actual figures. The Group has chosen to apply the IFRS 1 option and to zero the actuarial variances linked to employee benefits not yet recognized on the transition balance sheet by allocating them to shareholders' equity. All actuarial gains and losses of more than 10 % of the greater of the discounted value of the liability under the defined benefit plan or the fair value of the plan's assets are recognized in the income statement. The corridor method is used to spread any residual actuarial variances over the expected average remaining active lives of the staff covered by each plan, with the exception of variances concerning other long-term benefits.

**1.16. Put options granted on shares in consolidated subsidiaries**

Under IAS 27 and IAS 32, the put options granted to minority third parties in fully consolidated subsidiaries are reported in the financial liabilities at the present value of their estimated price with an offset in the form of a reduction in the corresponding minority interests.

The difference between the value of the option and the amount of the minority interests is recognized:

- in goodwill, in the case of options issued before January 1, 2010;
- in a reduction in the Group shareholders' equity (options issued after January 1, 2010).

The liability is estimated based on the contract information available (price, formula, etc.) and any other factor relevant to its valuation. Its value is reviewed at each year end and the subsequent changes in the liability are recognized:

- either as an offset to goodwill (options granted before January 1, 2010);
- as an offset to the Group shareholders' equity (options issued after January 1, 2010).

No impact is reported in the income statement other than the impact of the annual discounting of the liability recognized in the financial income; the income share of the

Group is calculated on the basis of the percentage held in the subsidiaries in question, without taking into account the percentage holding attached to the put options.

**1.17. Provisions**

A provision is recognized when the Group has a current commitment, whether statutory or implicit, resulting from a significant event prior to the closing date which would lead to a use of resources without offset, which can be reliably estimated.

These include, notably, provisions for site reinstatement, which are set aside progressively as quarries are used and include the projected costs related to the Group's obligation to reinstate such sites.

In accordance with IAS 37, provisions whose maturities are longer than one year are discounted when the impact is significant. The effects of this discounting are recorded under net financial income.

**1.18. Sales**

In accordance with IAS 18, sales are reported at fair value of the consideration received or due, net of commercial discounts and rebates and after deduction of excise duties collected by the Group under its business operations. Sales figures include transport and handling costs invoiced to customers.

Sales are recorded at the time of transfer of the risk and significant benefits associated with ownership to the purchaser, which generally corresponds to the date of transfer of ownership of the product or performance of the service.

**1.19. Income taxes**

Deferred taxes are calculated at the tax rates passed or virtually passed at the year-end and expected to apply to the period when assets are sold or liabilities are settled.

Deferred taxes are calculated, based on an analysis of the balance sheet, on timing differences identified in the Group's subsidiaries and joint ventures between the values recognized in the consolidated statement of financial position and the values of assets and liabilities for tax purposes.

Deferred taxes are recognized for all timing differences, including those on restatement of finance leases, except when the timing difference results from goodwill.

Deferred tax assets and liabilities are netted out at the level of each company. When the net amount represents a receivable, a deferred tax asset is recognized if it is probable that the company will generate future taxable income against which to allocate the deferred tax assets.

**1.20. Segment information**

In accordance with IFRS 8 "Operating segments" the segment information provided in Note 17 is based on information

taken from the internal reporting. This information is used internally by the Group Management responsible for implementing the strategy defined by the President of the Board of directors for measuring the Group's operating performance and for allocating capital expenditure and resources to the business segments and geographical areas.

The operating segments defined pursuant to IFRS 8 comprise the 3 segments in which the Vicat Group operates: Cement, Concrete & Aggregates and Other Products and Services.

The indicators disclosed were adapted in order to be consistent with those used by the Group Management, while complying with IFRS 8 information requirements: operating and consolidated sales, EBITDA and EBIT (cf. note 1.21), total non-current assets, capital employed (cf. note 17), industrial investments, net depreciation and amortization charges and average number of employees.

The management indicators used for internal reporting are identical to the operating segments and geographical sectors defined above and determined in accordance with the IFRS principles applied by the Group in its consolidated financial statements.

### 1.21. Financial indicators

The following financial performance indicators are used by the Group, as by other industrial players and notably in the building materials sector, and presented with the income statement:

**Added value:** the value of production less the cost of goods and services purchased;

**Gross Operating Earnings:** added value less expenses of personnel, taxes and duties (except income taxes and deferred taxes), plus grants and subsidies;

**EBITDA** (Earnings Before Interest, Tax, Depreciation and Amortization): the result of adding Gross Operating Earnings and other ordinary income (expense);

**EBIT:** (Earnings Before Interest and Tax): the result of adding EBITDA and net depreciation, amortization and operating provisions.

### 1.22. Seasonality

Demand is seasonal in the Cement, Ready-Mixed Concrete and Aggregates sectors, tending to decrease in winter in temperate countries and during the rainy season in tropical countries. The Group therefore generally records lower sales in the first and fourth quarters i.e. the winter season in the principal Western European and North American markets. In the second and third quarters, in contrast, sales are higher, due to the summer season being more favorable for construction work.

## Note 2 ▼ Changes in consolidation scope and other significant events

### Contrasting economic conditions characterized by poor weather conditions

Vicat's performance in the first half of 2012 was affected by contrasting economic conditions and much more unfavorable weather conditions than those seen in the first half of 2011. The decline in sales during the first half of the year in Europe and Africa & the Middle East was only partly offset by the upturn in sales in the United States and the continuing ramp-up of activities in India and Kazakhstan. However, although weather conditions had a particularly significant impact on the Group's performance during the first quarter, the return to milder temperatures during the second quarter allowed for a return to more solid growth, particularly in Switzerland and Turkey. Lastly, political events in Egypt and West Africa continued to disrupt the market and the Group's operating conditions in these regions, expecting the situation to return to normal very gradually.

### Increase in capital of Mynaral Tas

During the first semester, the Group subscribed a Mynaral Tas Company LLP capital increase up to KZT 6,682.5 million KZT on a total of 7,425 million KZT.

Issuing this operation, the group is owning 86.24 % stake of this company.

## Note 3 ▼ Goodwill

The change in the net goodwill by business sector is analyzed in the table below:

	Cement	Concrete and aggregates	Other products and services	Total
<b>At December 31, 2010</b>	<b>778,444</b>	<b>230,940</b>	<b>21,805</b>	<b>1,031,189</b>
Acquisitions / Additions		1,810		1,810
Disposals / Decreases				
Change in foreign exchange rates and other	(37,497)	4,213	480	(32,804)
<b>At December 31, 2011</b>	<b>740,947</b>	<b>236,963</b>	<b>22,285</b>	<b>1,000,195</b>
Acquisitions / Additions		3,000		3,000
Disposals / Decreases				
Change in foreign exchange rates and other	(2,299)	2,894	(192)	403
<b>At June 30, 2012</b>	<b>738,648</b>	<b>242,857</b>	<b>22,093</b>	<b>1,003,598</b>

### Impairment test on goodwill:

In accordance with IFRS 3 and IAS 36, at the end of each year and in the event of any evidence of impairment, goodwill is subject to an impairment test using the method described in notes 1.4 and 1.11.

Considering the very difficult macro-economic environment, the Group carried out a review of any evidence of impairment in respect to goodwill at June 30, 2012 which did not result in any recognition of impairment.

At June 30, 2012, goodwill are broken down by Cash Generating Unit (CGU) as follows:

UGT	Goodwill (In thousands of euros)	
	June 30, 2012	Dec. 31, 2011
CGU India	265,153	270,370
CGU West Africa Cement	151,120	150,776
CGU France-Italy	151,719	148,344
CGU Switzerland	134,133	133,482
Other cumulated CGU	301,473	297,223
<b>Total</b>	<b>1,003,598</b>	<b>1,000,195</b>

## Note 4 ▼ Other intangible assets

Other intangible assets are broken down by type as follows:

(In thousands of euros)	June 30, 2012	Dec. 31, 2011
Concessions, patents and similar rights	67,852	66,220
Software	4,686	4,558
Other intangible assets	26,823	28,922
Intangible assets in progress	1,114	1,089
<b>Other intangible assets</b>	<b>100,475</b>	<b>100,789</b>

Net other intangible assets amounted to € 100,475 thousand as at June 30, 2012 compared with € 100,789 thousand at the end of 2011. The change during the 1<sup>st</sup> semester 2012 was due primarily to € (4,329) thousand in amortization expense, € 4,263 thousand on acquisitions, with the balance resulting from changes in foreign exchange rates, reclassifications and disposals.

As at December 31, 2011, net other intangible assets amounted to € 100,789 thousand compared with € 101,496 thousand as at December 31, 2010. The change during 2011 was due primarily to € (9,438) thousand in amortization expense, € (9,294) thousand on acquisitions, changes in consolidation scope of € 58 thousand, with

the balance resulting from changes in foreign exchange rates, reclassifications and disposals.

No development cost was capitalized during the 1<sup>st</sup> semester 2012 and the year 2011.

With regard to greenhouse gas emission quotas, only the quotas held at year-end in excess of the cumulative actual emissions were recorded in other intangible assets at € 8,572 thousand (€6,680 thousand as at December 31, 2011), corresponding to 1,049 thousand tones (749 thousand tones at the year end 2011). Recording of surpluses, quota sales and quota swaps (EUA) against Emission Reduction Certificates (ERCs) were recognized in the income statement for the semester at € 3,500 thousand (€ 4,496 thousand at June 30, 2011).

## Note 5 ▼ Property, plant and equipment

Gross values (In thousands of euros)	Land & buildings	Industrial equipment	Other property, plant and equipment	Fixed assets work- in- progress and advances/down payments	Total
<b>At December 31, 2010</b>	<b>957,213</b>	<b>2,505,139</b>	<b>172,356</b>	<b>206,148</b>	<b>3,840,856</b>
Acquisitions	36,283	50,999	19,720	157,934	264,936

<b>At December 31, 2011</b>	<b>(357,255)</b>	<b>(1,309,805)</b>	<b>(119,520)</b>	<b>0</b>	<b>(1,786,580)</b>
Increase	(14,980)	(68,157)	(6,091)		(89,228)
Decrease	1,217	7,669	1,997		10,883
Changes in consolidation scope					-
Change in foreign exchange rates	(4,112)	(22,039)	(856)		(27,007)
Other movements	(891)	(2,051)	2,579		(363)
<b>At June 30, 2012</b>	<b>(376,021)</b>	<b>(1,394,383)</b>	<b>(121,891)</b>	<b>0</b>	<b>(1,892,295)</b>
Net book value at December 31, 2011	626,268	1,298,316	73,510	220,371	2,218,465
<b>Net book value at June 30, 2012</b>	<b>635,919</b>	<b>1,298,289</b>	<b>75,570</b>	<b>281,264</b>	<b>2,291,042</b>

Fixed assets work-in-progress amounted to € 251 million as at June 30, 2012 (€ 181 million as at December 31, 2011) and advances /down payments on plant, property and equipment represented € 30 million as at June 30, 2012 (€ 40 million as at December 31, 2011).

Contractual commitments to acquire tangible and intangible assets amounted to € 81 million as at June 30, 2012 (€ 126 million as at December 31, 2011).

The total amount of interest capitalized at June 30, 2012 was € 7,882 thousand (€ 1,673 thousand at June 30, 2011), determined on the basis of local interest rates ranging from 3.14 % to 8.23%, depending on the country in question.

## Note 6 ▼ Cash and cash equivalents

(In thousands of euros)	June 30, 2012	Dec. 31, 2011
Cash	89,564	106,184
Marketable securities	176,602	253,220
<b>Cash and cash equivalents</b>	<b>266,166</b>	<b>359,404</b>

## Note 7 ▼ Common stock

Vicat share capital is composed of 44,900,000 fully paid-up ordinary shares of € 4, including 944,050 treasury shares as at June 30, 2012 (1,009,426 as at December 31, 2011) acquired under the share buy-back programs approved by the Ordinary General Meetings, and through Heidelberg Cement's disposal of its 35 % stake in Vicat in 2007.

These are registered shares or bearer shares, at the shareholder's option. Voting rights attached to shares are proportional to the share of the capital which they represent and each share gives the right to one vote, except in the case of fully paid-up shares registered for at least 4 years in the name of the same shareholder, to which two votes are assigned.

The dividend paid in 2012 in respect of 2011 amounted to € 1.50 per share, amounting to a total of € 67,350

thousand, equal to € 1.50 per share paid in 2011 in respect of 2010 and amounting to a total of € 67,350 thousand.

In the absence of any dilutive instrument, diluted earnings per share are identical to basic earnings per share, and are obtained by dividing the Group's net income by the weighted average number of Vicat ordinary shares outstanding during the year.

Since January 4, 2010, for a period of 12 months renewable by tacit agreement, Vicat has engaged Natixis Securities to implement a liquidity agreement in accordance with the AMAFI (French financial markets professional association) Code of Ethics of September 20, 2008. The following amounts were allocated to the liquidity agreement for its implementation : 20,000 Vicat shares and € 3 million.

As at June 30, 2012, the liquidity account is composed with 65,012 Vicat shares and cash amounting to € 575 thousand.

## Note 8 ▼ Provisions

(In thousands of euros)

	June 30, 2012	Dec. 31, 2011
<b>Provisions for pensions and other post-employment benefits</b>	<b>54,348</b>	<b>52,631</b>
Restoration of sites	39,359	38,897
Demolitions	1,105	1,089
Other risks <sup>(1)</sup>	35,738	34,104
Other charges	16,663	15,192
<b>Other provisions</b>	<b>92,865</b>	<b>89,281</b>
<i>o.w. less than one year</i>	<i>11,553</i>	<i>10,911</i>
<i>o.w. more than one year</i>	<i>81,312</i>	<i>78,370</i>

1) At June 30, 2012, other risks included:

- an amount of €10.0 million (€10.2 million at December 31, 2011) corresponding to the current estimate of gross expected costs for repair of damage that occurred in 2006 following deliveries of concrete mixtures and concrete made in 2004 whose sulfate content exceeded applicable standards. This amount corresponds to the current estimate of the Group's pro rata share of liability for repair of identified damages before the residual insurance indemnity of € 4 million recognized in non-current assets on the balance sheet as at June 30, 2012 (€ 4 million as at December 31, 2011);
- an amount of € 10.3 million (€ 9.6 million as at December 31, 2011) corresponding to the estimated amount of the deductible at year-end relating to claims in the United States in the context of work accidents and which will be covered by the Group;
- the remaining amount of other provisions amounting to about € 15.4 million as at June 30, 2012 (€ 14.3 million as at December 31, 2011) corresponds to the sum of other provisions that, taken individually, are not material.

## Note 9 ▼ Debts and put options

The financial liabilities as at June 30, 2012:

(In thousands of euros)	June 30, 2012	Dec. 31, 2011
Debts at more than 1 year	1,439,801	1,364,079
Put options at more than 1 year	21,045	20,365
<b>Debts and put options at more than 1 year</b>	<b>1,460,846</b>	<b>1,384,444</b>
Asset derivative instruments more than 1 year <sup>(1)</sup>	(56,127)	(34,029)
<b>Total financial liabilities net of asset derivative Instruments more than 1 year</b>	<b>1,404,719</b>	<b>1,350,415</b>
Debts at less than 1 year	125,406	106,165
Put options at less than 1 year	-	-
<b>Debts and put options at less than 1 year</b>	<b>125,406</b>	<b>106,165</b>
Asset derivative instruments less than 1 year <sup>(1)</sup>	(240)	(73)

**Analysis of loans and debts by currency and type of interest rate**

By currency (net of currency swaps)

	June 30, 2012	Dec. 31, 2011
Euros	928,237	978,199
U.S. dollars	232,542	221,970
Turkish new liras	1,445	2,097
CFA francs	73,221	41,493
Swiss francs	65,843	44,571
Mauritanian Ouguiya	1,679	3,275
Indian rupee	205,873	144,537
<b>Total</b>	<b>1,508,840</b>	<b>1,436,142</b>

By interest rate

	June 30, 2012	Dec. 31, 2011
Fixed rate	987,408	906,434
Floating rate	521,432	529,708
<b>Total</b>	<b>1,508,840</b>	<b>1,436,142</b>

The average interest rate for gross debt at June 30, 2012 is 4.41%. It was 4.29 % at December 31, 2011.

**9.2. Put options granted to the minority shareholders on the shares in consolidated subsidiaries**

Agreements were concluded between Vigier Holding, Home Broker JSC (formerly KazKommerts Invest) and Société Financière Internationale, in order to arrange their relationship within Mynaral Tas, under which the Group granted put options to their partners on their stake in this company. These options are respectively exercisable at earliest on December 2013 and on December 2015.

Reporting these options resulted in recognition of a liability of € 21.0 million at June 30, 2012 (€ 20.4 million at December 31, 2011), corresponding to the discounted value of the option exercise price.

## Note 10 ▼ Financial instruments

### Foreign exchange risk

The Group's activities are carried out by subsidiaries operating almost entirely in their own country and local currency. This limits the Group's exposure to foreign exchange risk. These companies' imports and exports denominated in currencies other than their own local currency are generally hedged by forward currency purchases and sales. The foreign exchange risk on intercompany loans is hedged by the companies when the borrowing is denominated in a currency other than their operating currency.

Moreover, the principal and interest due on loans originally issued by the Group in US dollars (US \$ 240 and 450 million for Vicat and US \$ 70 million for Vicat Sagar Cement Private Limited) and in Euros (€138.8 million for Vicat Sagar Cement Private Limited) were converted into euros (for Vicat) and into Indian Rupees (for Vicat Sagar Cement Private Limited) through a series of cross currency swaps, included in the portfolio presented below (cf. a).

### Interest rate risk

All floating rate debt is hedged through the use of caps on original maturities of 2, 3, 5, 10 and 12 years and of swaps on original maturities of 3 and 5 years.

The Group is exposed to interest rate risk on its financial assets and liabilities and its short-term investments. This exposure corresponds to the price risk for fixed-rate assets and liabilities, and cash flow risk related to floating-rate assets and liabilities.

### Liquidity risk

As at June 30, 2012, the Group had € 296 million in unused confirmed lines of credit that have not been allocated to

the hedging of liquidity risk on commercial paper (€ 381 million as at December 31, 2011).

The Group also has a € 300 million commercial paper issue program. As at June 30, 2012, € 290 million in commercial paper had been issued. Commercial paper consists of short-term debt instruments backed by confirmed lines of credit in the amounts issued and classified as medium-term borrowings in the consolidated balance sheet.

Unused confirmed lines of credit are used to cover the risk of the Group finding itself unable to issue its commercial paper through market transactions. As at June 30, 2012, these lines matched the short term notes they covered, at € 290 million.

Some medium-term or long-term loan agreements contain specific covenants especially as regards compliance with financial ratios, reported each half year, which can lead to an anticipated repayment (acceleration clause) in the event of non-compliance. These covenants are based on a profitability ratio (leverage: net debt/consolidated EBITDA) and on capital structure ratio (gearing: net debt/consolidated shareholders' equity) of the Group or its subsidiaries concerned. For the purposes of calculating these covenants, the net debt is determined excluding put options granted to minority shareholders. Furthermore, the margin applied to some financing operations depends on the level reached on one of these ratios.

Considering the small number of companies concerned, essentially Vicat SA, the parent company of the Group, the level of gearing (50.4%) and leverage (2.84x) and the liquidity of the Group's balance sheet, the existence of these covenants does not constitute a risk for the Group's financial positions. As at June 30, 2012, the Group is compliant with all ratios required by covenants in financing contracts.

(1) Net capital employed corresponds to the sum of non-current assets, assets and liabilities held for sale, and working capital requirement, after deduction of provisions and deferred taxes..

**c) Information about major customers**

The Group has no reliance in any major customers, none of which accounts for more than 10% of sales.

## Note 18 ▼ Net cash flows generated from operations

Net cash flows from operating transactions conducted by the Group in the first semester 2012 amounted to € 64.8 million, compared with € 126.5 million at June 30, 2011.

This decrease in cash flows generated by operating activities between the first semesters 2011 and 2012 results from a € (44.5) million decrease in cash flow from operations and by a € (17,3) million increase in the change in the working capital requirement

The working capital requirement (WCR) broken down by type is as follows:

(In thousands of euros)	WCR at December 31, 2010	Change in WCR in 2011	Other changes <sup>(1)</sup>	WCR at December 31, 2011	Change in WCR in 2012	Other changes <sup>(1)</sup>	WCR at June 30, 2012
Inventories	356,521	8,763	(5,180)	360,104	9,589	3,558	373,251
Other WCR components	81,937	2,423	16,081	100,441	75,227	(460)	175,208
<b>WCR</b>	<b>438,458</b>	<b>11,186</b>	<b>10,901</b>	<b>460,545</b>	<b>84,816</b>	<b>3,098</b>	<b>548,459</b>

(1) Exchange rates, consolidation scope and miscellaneous.

## Note 19 ▼ Net cash flows from investment activities

Net cash flows linked to Group investment transactions in the first semester 2012 amounted to € (145.8) million, compared with € (156.2) million at June 30, 2011.

### Acquisitions of intangible and tangible assets

These include outflows corresponding to industrial investments, which amounted to € (146.6) million, compared with € (122.1) million euros in the first semester 2011.

The main intangible and tangible investments at June 30, 2012 were mainly achieved in India in relation to the construction of the Vicat Sagar Cement factory and to a lesser extent, in France, Senegal, Switzerland, Turkey and Kazakhstan.

The main intangible and tangible investments at June 30, 2011 were realized in India, France and Kazakhstan.

### Acquisition / disposal of shares of consolidated companies

Consolidated company share acquisitions during the first semester of 2012 resulted in a total outflow of € (0.9) million. No disposal of shares of consolidated companies occurred during this period.

The outflow from the Group during this 1<sup>st</sup> semester 2012 is relative to a complementary stake in a full consolidated French company.

During the 1<sup>st</sup> semester of 2011, operations linked to changes in the consolidation scope had resulted in an overall outflow of € (22.7) millions. No disposal of shares of consolidated companies occurred during this period.

The main outflow from the Group during this 1<sup>st</sup> semester 2011 was made with the complementary 21 % stake of Mynaral Tas Company LLP.

## Note 20 ▼ Analysis of net cash balances

(In thousands of euros)

	At June 30, 2012 Net	At December 31, 2011 Net
Cash and cash equivalents (see note 6)	266,166	359,404
Bank overdrafts	(18,341)	(15,391)
<b>Net cash balances</b>	<b>247,825</b>	<b>344,013</b>

## Note 21 ▼ Transactions with related companies

In addition to information required for related parties regarding the senior executives, related parties with whom transactions are carried out include affiliated companies and joint ventures in which Vicat directly or indirectly holds a stake, and entities that hold a stake in Vicat.

Such transactions were not significant in the 1<sup>st</sup> semester 2012 and were conducted under normal market terms and conditions.

These operations have all been recorded in compliance with the transactions stipulated in IAS 24 and their impact on the Group's consolidated financial statements at June 30, 2012 and 2011 is as follows, broken down by type and by related party :

(In thousands of euros)	June 30, 2012				June 30, 2011			
	Sales	Purchases	Receivables	Debts	Sales	Purchases	Receivables	Debts
Affiliated companies	83	893	6,642	254	212	566	6,775	134
Joint ventures	490	273	92	137	581	390	159	561
Other related parties	18	1,133				1,049		
<b>Total</b>	<b>591</b>	<b>2,299</b>	<b>6,734</b>	<b>391</b>	<b>793</b>	<b>2,005</b>	<b>6,934</b>	<b>695</b>

## Note 22 ▼ Post balance sheet events

No post balance sheet event has had a material impact on the consolidated financial statements as at June 30.

## Note 23 ▼ List of significant consolidated companies as at June 30, 2012
